

The Protector ePump

Technology-infused sump pump system

Dualcom Backup Sump Pump

Product Summary

The ONLY system technologically advanced and performance capable enough to be called "The closest No Flood Guarantee as possible" (Plumbing Industry Trade, 2008). The Protector DualCom ePump System (dual pump version), the world's only SmartHome sump pump system. Amazing ePump technology that tests, monitors, detects, and if necessary, calls and emails you!

Includes:

- The revolutionary DualCom ePump Control Unit (AC/DC power, 37 point testing, 24/7 server connection)
- Dual Protector 4000 pumps
- Dual sensors (redundancy and high water alarm)
- 2 battery boxes (keeps batteries safe and clean)
- Thorough twice daily testing of the entire system (detection of any sump related problem, most tests are preventative and early warning)
- Notification of any alerts via phone and email (within just a few minutes allows you to react and prevent a problem)
- 24/7 monitoring
- 5 year warranty!

Specifications

- Up to 80 GPM at 10'
- 14 hours of continuous run-time, 6 days of normal run-time without power
- Indestructible, never-corrode pump construction
- Hand-built electronics
- Made in the USA

Protector ePump Dualcom

Singlecom Backup Sump Pump

Product Summary

The Protector SingleCom ePump utilizes the same technology as the dual pump version. All self-testing and notification features are included. This only difference is that the SingleCom utilizes a single Protector 4000 pump instead of dual pumps. Appropriate for the homeowner that wants the Peace of Mind of an ePump but doesn't need the high dual pumping capacity, and is less concerned about having pump redundancy.

Includes:

- The revolutionary ePump Control Unit (AC/DC power, 37 point testing, 24/7 server connection)
- One Protector 4000 pump
- Dual sensors (redundancy and high water alarm)
- Battery box (keeps battery safe and clean)
- Thorough twice-daily self-testing of entire system (detection of any sump related problem, most tests are preventative and early warning)
- Notification of any alerts via phone and email (within just a few minutes allows you to react and prevent a problem)
- 24/7 monitoring
- 5 year warranty!

Specifications

- Up to 40 GPM at 10'
- 7-14 hours of continuous run-time, up to 6 days of normal run-time without power
- Indestructible, never-corrode pump construction
- Hand-built electronics
- Made in the USA
